CAREER OBJECTIVE

BCA undergraduate with hands-on exposure to Python, Linux environments, AI tools, Git/GitHub, and cybersecurity fundamentals. Passionate about artificial intelligence, system-level technologies, automation, and open-source ecosystems. Actively building practical skills through AI-assisted workflows, scripting, technical experimentation, and self-driven projects while seeking internship opportunities to gain industry exposure.

EXPERIENCE Academic & Self-Learning Experience 2025 – Present

Self-Driven Technical Learning

- Worked extensively with AI-powered tools and assistants to enhance productivity, research workflows, technical learning, and experimentation.
- Developed front-end fundamentals using HTML, CSS, and basic JavaScript concepts.
- Explored AI-assisted development workflows for faster debugging, learning, and project ideation.
- Practices Python scripting and Linux-based workflows to strengthen problem-solving and system-level understanding.
- Explores cybersecurity concepts, networking fundamentals, terminal-based environments, and open-source tools through hands-on practice.
- Uses Git and GitHub for version control, documentation, and project organization.

SKILLS

Programming	Python, C, MySQL
Front-End Development	HTML, CSS
Currently Learning	Back-end development fundamentals
Operating Systems	Windows, Linux, Kali Linux
Cybersecurity	Security fundamentals, system awareness
Tools	Git, GitHub
Learning Focus	Networking basics, system internals

PROJECTS

AI-Assisted Smart Rover System (Ongoing)

- Currently developing a smart rover prototype using ESP32-based hardware and AI-assisted workflows.
- Exploring integration of sensors, wireless communication, and basic automation concepts for real-time interaction and control.
- Working with Linux environments, Python scripting, and embedded system concepts during project planning and experimentation.
- Researching applications of AI tools in debugging, workflow optimization, and rapid prototyping.

- Focused on understanding system integration, hardware-software communication, and practical problem-solving. [View Repository](#)

CERTIFICATIONS

- E&ICT Academy, IIT Kanpur, TCSION AI for ALL, Hackathon participant

ACHIEVEMENTS & ACTIVITIES

- School-level skating athlete with multiple competition wins, demonstrating discipline, consistency, and competitive focus.
- Discipline In-Charge during Classes XI and XII, responsible for maintaining order, coordination, and student conduct.
- Developed leadership, accountability, and time-management skills through sports participation and student responsibilities.

EDUCATION Bachelor of Computer Applications (BCA) 2025 – Present

IMS Ghaziabad (University Courses Campus)

Affiliated to Chaudhary Charan Singh University (CCS University)

Current Semester: 3rd
